NEW

0.7mm height FPC-to-Board Connectors up to 10Amps

BM25 Series

Features

1. Capable of high current power supply [Rated current : 10A]

10Amps for power contact, 0.3Amps for signal contact.

Allows for power source design with a high safety rating.

2. Robust [70N*1]

Longitudinal metal coated guide mitigates damage in a misaligned mating.

3. Contributes to power saving $[1m\Omega \text{ or } \text{less}^{*2}]$

Contact Resistance Specifications

Power contact : $5m\dot{\Omega}$ or less

Signal contact : 30mΩ or less

The above contact resistance specifications contribute to power saving.

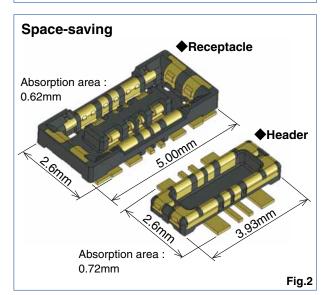

Contact Resistance Measurement : Power contact : $1m\Omega$ or less, Signal contact : $10m\Omega$ or less

- *1 : Actual measurement of the failure strength in a misaligned mating operation.
- *2 : Actual contact resistance measurement of the power contact, does not guarantee that the value is $1m\Omega$ or less.

Devices that are required to be thinner and smaller, such as mobile phones, wearable terminals and tablet PCs.

Fig.1

Robust Design

Unique metal guide considerably mitigates the housing damage due to incorrect mating Failure strength : 70N

2016.7 **HS** 1

Product Specifications

Ratings	Cı	urrent rating	Power contact : 10A Signal contact : 0.3A	Oper	ating temperature range	-40 to 85°C (Note 1)		
rialingo	Vo		30V AC/DC	Stor	age temperature range	-10 to 60℃ (Note 2)		
Item		Specification			Conditions			
1. Contact resistance		Signal contact : Max of $30m\Omega$ Power contact : Max of $5m\Omega$			Measured at 20mV AC, 1kHz, 1mA			
2. Insulation resistance		Minimum of 1000MΩ			Measured at 100V DC			
3. Withstanding voltage		No flashover or insulation breakdown			Conduct 150V AC for 1 minute			
4. Durability		Contact resistance : Signal contact Max of $30m\Omega$ Power contact Max of $5m\Omega$			10 mating cycles			
5. Vibration		No electrical discontinuity of 1μ s or longer			Frequency : 10 to 55Hz, single amplitude of 0.75mm, 10 cycles in each of 3 axis directions for 5 minutes / cycle			
6. Humidity		Contact resistance : Signal contact Max of $30m\Omega$ Power contact Max of $5m\Omega$ Insulation resistance : Min of $100M\Omega$			96 hours at a temperature of 40 $\pm 2^{\circ}$ and a humidity range from 90 to 95%			
7. Temperature cycle			nce : Signal contact Max of Power contact Max of stance : Min of 100MΩ		-55 ± 3 °C : 30 minutes → 85 ± 2 °C : 30 minutes, 5 cycles			
8. Solder Heat Resistance		-	elting or deformity on the parts and no negative effect	ts on	Reflow : according to the Recommended Solder Profile Hand soldering : Soldering iron temperature 350°C, no more than 3 seconds of contact			

Note 1 : Includes temperature rise caused by current flow.

Note 2 : The term "storage" here refers to products stored for a long period prior to board mounting and use. The operating temperature and humidity range covers the non-energized condition of connectors after board mounting and the temporary storage conditions during transportation, etc.

Materials / Finish

Product	Part	Material	Finish	UL standard	
Decentacia / Header	Insulator	LCP	Black	UL94V-0	
Receptacle / Header	Contacts	Copper alloy	Gold plated		

Product Number Structure

Refer to the chart below when determining the product specifications from the product number. Please select from the product numbers listed in this catalog when placing orders.

Receptacles / Headers

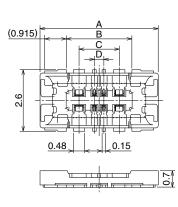

Series name : BM	S Number of power contacts
2 Series No. : 25	6 Termination type
8 Number of signal contacts	V : Straight SMT
 Connector type : S : Receptacle 	 Gold plated specification and packaging status (51) : Gold plate thickness 0.05µm
P : Header	Embossed tape packaging (20,000pcs/reel)

Precautions

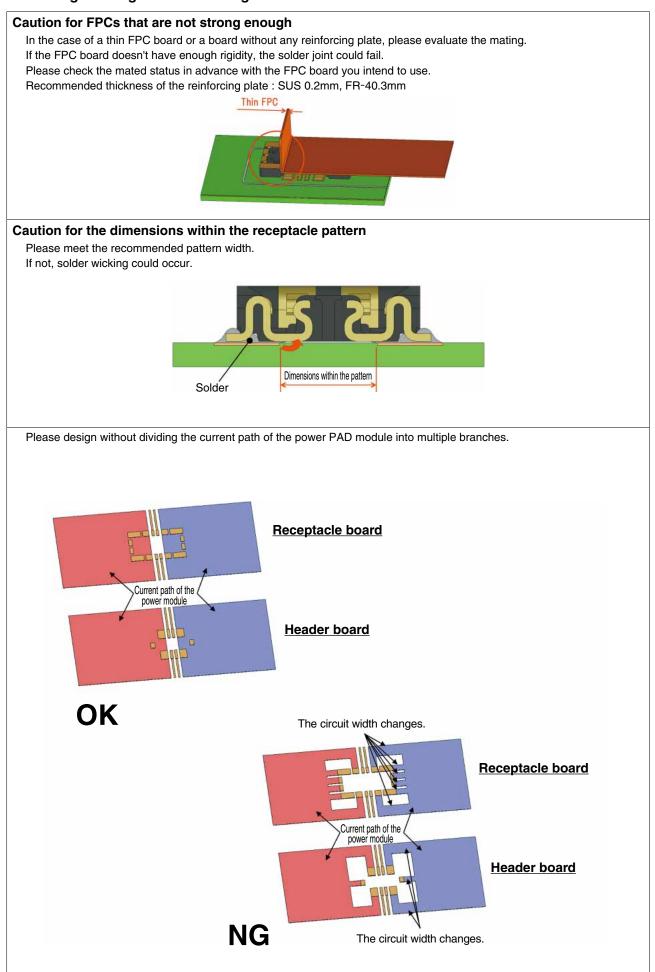

1.Recommended temperature profile	MAX 250°C
temperature profile	250 200 200 200 200 200 200 200
2. Recommended hand	at a minimum of 1,000 [ppm]. Please contact us if the concentration is below 1,000 [ppm]. Soldering iron temperature : $340 \pm 10^{\circ}$ C,
soldering conditions 3. Recommended screen thickness/aperture ratio (nottern area ratio)	Soldering time : within 3 seconds Thickness : 0.1mm Open area ratio : 100% for signal contact, and 100% for power contact on the Receptacle side.
(pattern area ratio) 4. Warpage of the PCB	100% for signal contact, and 70% for power contact on the Header side.A maximum of 0.02mm at the center part of the connector based on both ends of the connector.
5. Cleaning	Not recommended. If you clean this product, please evaluate the performance before using it. (Cleaning may cause a change in the mating/unmating property and its resistance to environment)
6. Notes	 Care should be taken that mating/unmating operation when the product is not mounted on the PCB could cause damage or deformation, etc. of the contact. Avoid supporting the PCB only by connectors, and support it by other means than connectors. Care should be taken that excessive prying mating/unmating could cause damage. During hand soldering, do not apply flux which will cause flux oozing on connector. This product may differ in hue due to production lot variability, but it doesn't have any influence on the performance. Please refer to the next page for the precautions for mating/unmating. Considering the possibility of disengagement due to the counterforce caused by the drop, impact and routing of FPC, fix the mated state by the use of housings and cushion materials, etc. Caution! Do not use the connector in non-recommended conditions (i.e., rated current, rated voltage, PCB design and operating environment, etc.). Such usage could lead to material outgassing, ignition, or short-circuit, etc. Refer to the specifications and the guidelines for board pattern dimensions, board cautions, and connector treatment. Pleasae contact Hirose if using the connector under conditions other than those described in the specifications and the guidelines is being considered.

•Handling warning when mating the connector
